Features & Advantages

Feature

Details

formsflow.ai Advantage

Standard Form Builder

Drag and drop form components with scripting options, conditional logic, API calls, field validation, and RPA integration.

Powerful and nuanced front-end functionalities, unlike most conventional form builders.

BPMN/DMN Workflows

Enables easy collaboration between process automation specialists and developers, using a Camunda-based workflow engine.

Most form builders do not scalable workflow engines. Lack of standard notations limits scalability and cross-team collaboration.

Advanced Analytics

Comes packed with form submission and data visualisation dashboards. Sentiment analysis and natural language recognition ready.

Eliminates the need for a separate analytics solution. Moving data to a different analytics platform makes it cumbersome for business teams and data governance.

Unlimited Users

formsflow.ai pricing is usage and feature-based, with no caps on seat count whatsoever.

Most form-led automation alternatives have user seat based pricing, which results in skyrocketing costs. We enable enterprise adoption without pricing risks.

Form Bundling

Bundle associated forms to streamline complex workflows, for example, a multi-step enrollment approval process.

Manage related groups of forms with unique workflows vs trying to manage multiple related forms separately.

Simplified Workflow Builder

If your workflow does not require you to follow BPMN notations, a simplified workflow builder allows you to build workflows intuitively

The intuitive, drag-and-drop workflow builder makes the platform flexible for multiple user personas.

Flow-E, AI Assisted Form Builder

Build out forms in minutes with simple prompts and refine them in the low code form designer. (Flow-E 2.0 is set to launch in 2026 Spring)

Traditional platforms do not seamlessly interlace AI and low code. formsflow.ai adds intelligence, with simplicity.

Product Support

Premium versions come with dedicated product support. You can also upgrade product support plans.

Get software vendor support from formsflow.ai team to build your POC or more, based on the product package. Customise the support package for SLAs, Time Zones etc

Add-ons available with On-Prem Packages

COMMUNITY

Add-on Definitions

Add-on	Details	formsflow.ai Advantage
Additional Tenants	Enables organizations to efficiently manage multiple independent tenants in a single environment.	Add tenants to your implementation to segregate groups or departments into their own forms and workflows.
Mobile App / Offline	A fully-featured form submission & task management app framework built for Android and iOS.	The app allows your team to operate from mobile devices and in use cases where the users could go offline.
Custom Training	Our training specialists will deliver bespoke training sessions to meet the unique needs of your team. We have pre-packaged week-long modules to address most common training needs.	Our expert team of training specialists offers custom programs, ensuring a flexible and comprehensive approach to meet your organization's learning objective
Solution Consulting	Our experienced solutions consultants will work with you, handling everything from form and workflow creation, to custom development for production or POC.	We have experience delivering high-impact and secure projects for Governments, software vendors and mid- large enterprises.

Addition of **optional Add-Ons** to Premium moves you to a **Premium Enterprise Package** and we will work together to build a **custom quote** for you.

- Pricing matrix will differ for resellers and white-labelled OEM providers.
- Pricing matrix will differ for Public Sector Clients and Government Agencies.

Our copyleft licensing model promotes software freedom, navigates legal complexities, and fosters an environment of open innovation.
